Preface	8
About this book	
Notes for iOS developers	
TIMTOWTDI	
Introduction: Swift for Complete Beginners	19
How to install Xcode and create a playground	
Variables and constants	
Types of Data	
Operators	
String interpolation	
Arrays	
Dictionaries	
Conditional statements	
Loops	
Switch case	
Functions	
Optionals	
Optional chaining	
Enumerations	
Structs	
Classes	
Properties	
Static properties and methods	
Access control	
Polymorphism and typecasting	
Closures	
Wrap up	

Project 1: Storm Viewer	104
Setting up	
Splitting a window in two	
Adding custom controllers	
Designing our interface	
Introducing outlets	
Showing some table rows	
Loading our images	
Responding to table selection	
Finishing touches	
Wrap up	
Project 2: Cows and Bulls	154
Setting up	
Designing our user interface	
Filling in the table view	
Setting up the game	
Marking guesses	
Wrap up	
Project 3: Social media	175
Setting up	
Subclassing NSSplitViewController	
Creating a toolbar	
Wrap up	
Project 4: Grid Browser	188
Setting up	
Starting with the toolbar	
Layout with stack views	
App Transport Security	
Creating and destroying web views	
What's selected?	
Handling navigation	

Adding Touch Bar controls
Wrap up

Project 5: Capital Cities **242**

Setting up
Creating a map view
Dropping pins
Keeping score
Wrap up

Project 6: Auto Layout **268**

Setting up
Visual Format Language
Auto Layout anchors
Stack views
Grid views
Wrap up

Project 7: Photo Memories **285**

Setting up
Designing with collection views
Selecting items
Loading images from disk
Importing files
Re-arranging photos
Detecting keypresses with `keyUp()`
So... now what?
Making a video composition
Wrap up

Project 8: Odd One Out **336**

Setting up
Creating a grid of buttons

- Generating layouts
- Click to win
- Game over
- Finishing touches
- Dark mode
- Wrap up

Project 9: GCD **372**

- Setting up
- Performing selectors in the background
- Running arbitrary code on different threads
- Running delayed code
- Concurrent execution
- Wrap up

Project 10: WeatherBar **385**

- Setting up
- The art of nothingness
- Creating a settings screen
- Saving and loading settings
- Parsing JSON
- Updating the user interface
- Creating more menu items
- Wrap up

Project 11: Bubble Trouble **425**

- Setting up
- Cleaning up the Xcode template
- Bubbles... bubbles everywhere!
- Setting the universe in motion
- Adding some difficulty
- Gotta pop 'em all
- Wrap up

Project 12: Animation	451
Setting up	
Constructing a test environment	
Basic animator proxy use	
Animating layers	
Advanced layer animation	
Wrap up	
Project 13: Screenable	466
Setting up	
Designing the user interface	
Populating the popup buttons	
Drawing images and gradients	
Rendering the caption	
Importing a screenshot	
Exporting the finished product	
NSDocument and NSCoder	
Wrap up	
Project 14: Shooting Gallery	517
Setting up	
Creating the game world	
Creating a custom node	
Click, click, bang!	
Adding some polish	
Wrap up	
Project 15: NSUndoManager	544
Setting up	
Reversible changes	
Doubling up methods	
Wrap up	

Project 16: Bookworm	556
Setting up	
Set up for success	
Manipulating arrays with NSArrayController	
Binding everything	
Creating an emoji formatter	
Presenting a credits screen	
Wrap up	
Project 17: Match Three	582
Setting up	
A grid of balls	
Matching colors	
Making room for more	
Tracking score	
A puff of smoke	
Wrap up	
Project 18: Bindings	616
Setting up	
KVC and KVO	
The imperial march	
Property observers and KVO	
Dependent properties and formatters	
Wrap up
