<b>Preface</b>	<b>7</b>
About this book	
Notes for iOS developers	
TIMTOWTDI	
<b>Introduction: Swift for Complete Beginners</b>	<b>17</b>
How to install Xcode and create a playground	
Variables and constants	
Types of Data	
Operators	
String interpolation	
Arrays	
Dictionaries	
Conditional statements	
Loops	
Switch case	
Functions	
Optionals	
Optional chaining	
Enumerations	
Structs	
Classes	
Properties	
Static properties and methods	
Access control	
Polymorphism and typecasting	
Closures	
Wrap up	
<b>Project 1: Storm Viewer</b>	<b>97</b>
Setting up	
Splitting a window in two	
Adding custom controllers	
Designing our interface	
Introducing outlets	
Showing some table rows	
Loading our images	
Responding to table selection	

Finishing touches  
Wrap up

## **Project 2: Cows and Bulls** **142**

Setting up  
Designing our user interface  
Filling in the table view  
Setting up the game  
Marking guesses  
Wrap up

## **Project 3: Social media** **163**

Setting up  
Subclassing NSSplitViewController  
Creating a toolbar  
Wrap up

## **Project 4: Grid Browser** **176**

Setting up  
Starting with the toolbar  
Layout with stack views  
App Transport Security  
Creating and destroying web views  
What's selected?  
Handling navigation  
Adding Touch Bar controls  
Wrap up

## **Project 5: Capital Cities** **225**

Setting up  
Creating a map view  
Dropping pins  
Keeping score  
Wrap up

## **Project 6: Auto Layout** **250**

Setting up  
Visual Format Language  
Auto Layout anchors  
Stack views  
Grid views  
Wrap up

<b>Project 7: Photo Memories</b>	<b>266</b>
Setting up	
Designing with collection views	
Selecting items	
Loading images from disk	
Importing files	
Re-arranging photos	
Detecting keypresses with keyUp()	
So... now what?	
Making a video composition	
Wrap up	
<b>Project 8: Odd One Out</b>	<b>316</b>
Setting up	
Creating a grid of buttons	
Generating layouts	
Click to win	
Game over	
Finishing touches	
Wrap up	
<b>Project 9: GCD</b>	<b>348</b>
Setting up	
Performing selectors in the background	
Running arbitrary code on different threads	
Running delayed code	
Concurrent execution	
Wrap up	
<b>Project 10: WeatherBar</b>	<b>360</b>
Setting up	
The art of nothingness	
Creating a settings screen	
Saving and loading settings	
Parsing JSON	
Updating the user interface	
Creating more menu items	
Wrap up	
<b>Project 11: Bubble Trouble</b>	<b>397</b>
Setting up	

Cleaning up the Xcode template  
Bubbles... bubbles everywhere!  
Setting the universe in motion  
Adding some difficulty  
Gotta pop 'em all  
Wrap up

## **Project 12: Animation** **421**

Setting up  
Constructing a test environment  
Basic animator proxy use  
Animating layers  
Advanced layer animation  
Wrap up

## **Project 13: Screenable** **436**

Setting up  
Designing the user interface  
Populating the popup buttons  
Drawing images and gradients  
Rendering the caption  
Importing a screenshot  
Exporting the finished product  
NSDocument and NSCoder  
Wrap up

## **Project 14: Shooting Gallery** **486**

Setting up  
Creating the game world  
Creating a custom node  
Click, click, bang!  
Adding some polish  
Wrap up

## **Project 15: NSUndoManager** **511**

Setting up  
Reversible changes  
Doubling up methods  
Wrap up

## **Project 16: Bookworm** **523**

Setting up

- Set up for success
- Manipulating arrays with NSArrayController
- Binding everything
- Creating an emoji formatter
- Presenting a credits screen
- Wrap up

## **Project 17: Match Three**

**543**

- Setting up
- A grid of balls
- Matching colors
- Making room for more
- Tracking score
- A puff of smoke
- Wrap up

## **Project 18: Bindings**

**573**

- Setting up
- KVC and KVO
- The imperial march
- Property observers and KVO
- Dependent properties and formatters
- Wrap up
