

Contents

Preface	13
About this book	
Introduction: Swift for Complete Beginners	18
How to install Xcode and create a playground	
Variables and constants	
Types of Data	
Operators	
String interpolation	
Arrays	
Dictionaries	
Conditional statements	
Loops	
Switch case	
Functions	
Optionals	
Optional chaining	
Enumerations	
Structs	
Classes	
Properties	
Static properties and methods	
Access control	
Polymorphism and typecasting	
Closures	
Wrap up	
Project 1: Storm Viewer	103
Setting up	

- Listing images with FileManager
- Designing our interface
- Building a detail screen
- Loading images with UIImage
- Final tweaks: hidesBarsOnTap, safe area margins
- Wrap up

Project 2: Guess the Flag **152**

- Setting up
- Designing your layout
- Making the basic game work: UIButton and CALayer
- Guess which flag: random numbers
- From outlets to actions: IBAction and string interpolation
- Wrap up

Project 3: Social Media **187**

- About technique projects
- UIActivityViewController explained
- Wrap up

Project 4: Easy Browser **196**

- Setting up
- Creating a simple browser with WKWebView
- Choosing a website: UIAlertController action sheets
- Monitoring page loads: UIToolbar and UIProgressView
- Refactoring for the win
- Wrap up

Project 5: Word Scramble **220**

- Setting up
- Reading from disk: contentsOfFile
- Pick a word, any word: UIAlertController
- Prepare for submission: lowercased() and IndexPath

Returning values: contains
Or else what?
Wrap up

Project 6: Auto Layout **250**

Setting up
Advanced Auto Layout
Auto Layout in code: addConstraints with Visual Format Language
Auto Layout metrics and priorities: constraints(withVisualFormat:)
Auto Layout anchors
Wrap up

Project 7: Whitehouse Petitions **270**

Setting up
Creating the basic UI: UITabBarController
Parsing JSON using the Codable protocol
Rendering a petition: loadHTMLString
Finishing touches: didFinishLaunchingWithOptions
Wrap up

Project 8: 7 Swifty Words **294**

Setting up
Buttons... buttons everywhere!
Loading a level: addTarget and shuffling arrays
It's play time: index(of:) and joined()
Property observers: didSet
Wrap up

Project 9: Grand Central Dispatch **314**

Setting up
Why is locking the UI bad?
GCD 101: async()
Back to the main thread: DispatchQueue.main

Easy GCD using performSelector(inBackground:)
Wrap up

Project 10: Names to Faces **328**

Setting up
Designing UICollectionView cells
UICollectionView data sources
Importing photos with UIImagePickerController
Custom subclasses of NSObject
Connecting up the people
Wrap up

Project 11: Pachinko **350**

Setting up
Falling boxes: SKSpriteNode, UITouch, SKPhysicsBody
Bouncing balls: circleOfRadius
Spinning slots: SKAction
Collision detection: SKPhysicsContactDelegate
Scores on the board: SKLabelNode
Special effects: SKEmitterNode
Wrap up

Project 12: UserDefaults **381**

Setting up
Reading and writing basics: UserDefaults
Fixing Project 10: NSCoder
Fixing Project 10: Codable
Wrap up

Project 13: Instafilter **395**

Setting up
Designing the interface
Importing a picture: UIImage

Applying filters: CGContext, CIFilter
Saving to the iOS photo library
Wrap up

Project 14: Whack-a-Penguin **415**

Setting up
Getting up and running: SKCropNode
Penguin, show thyself: SKAction moveBy(x:y:duration:)
Whack to win: SKAction sequences
Wrap up

Project 15: Animation **436**

Setting up
Preparing for action
Switch, case, animate: animate(withDuration:)
Transform: CGAffineTransform
Wrap up

Project 16: JavaScript Injection **450**

Setting up
Making a shell app
Adding an extension: NSExtensionItem
What do you want to get?
Establishing communication
Editing multiline text with UITextView
Fixing the keyboard: NotificationCenter
Wrap up

Project 17: Swifty Ninja **473**

Setting up
Basics quick start: SKShapeNode
Shaping up for action: CGPath and UIBezierPath
Enemy or bomb: AVAudioPlayer

Follow the sequence
Slice to win
Game over, man: SKTexture
Wrap up

Project 18: Debugging **514**

Setting up
Basic Swift debugging using print()
Debugging with assert()
Debugging with breakpoints
View debugging
Wrap up

Project 19: Capital Cities **525**

Setting up
Up and running with MapKit
Annotations and accessory views: MKPinAnnotationView
Wrap up

Project 20: Fireworks Night **539**

Setting up
Ready... aim... fire: Timer and follow()
Swipe to select
Making things go bang: SKEmitterNode
Wrap up

Project 21: Local Notifications **558**

Setting up
Scheduling notifications: UNUserNotificationCenter and
UNNotificationRequest
Acting on responses
Wrap up

Project 22: Detect-a-Beacon	571
Setting up	
Requesting location: Core Location	
Hunting the beacon: CLBeaconRegion	
Wrap up	
Project 23: Space Race	584
Setting up	
Space: the final frontier	
Bring on the enemies: linearDamping, angularDamping	
Making contact: didBegin()	
Wrap up	
Project 24: Swift Extensions	597
Setting up	
Creating a Swift extension	
Protocol-oriented programming for beginners	
Extensions for brevity	
Wrap up	
Project 25: Selfie Share	607
Setting up	
Importing photos again	
Going peer to peer: MCSession, MCBrowserViewController	
Invitation only: MCPeerID	
Wrap up	
Project 26: Marble Maze	624
Setting up	
Loading a level: categoryBitMask, collisionBitMask, contactTestBitMask	
Tilt to move: CMMotionManager	
Contacting but not colliding	

Wrap up

Project 27: Core Graphics **644**

- Setting up
- Creating the sandbox
- Drawing into a Core Graphics context with UIGraphicsImageRenderer
- Ellipses and checkerboards
- Transforms and lines
- Images and text
- Wrap up

Project 28: Secret Swift **668**

- Setting up
- The basic text editor
- Writing somewhere safe: the iOS keychain
- Touch to activate: Touch ID, Face ID and LocalAuthentication
- Wrap up

Project 29: Exploding Monkeys **682**

- Setting up
- Building the environment: SKTexture and filling a path
- Mixing UIKit and SpriteKit: UISlider and SKView
- Unleash the bananas: SpriteKit texture atlases
- Destructible terrain: presentScene
- Wrap up

Project 30: Instruments **718**

- Setting up
- What are we working with?
- What can Instruments tell us?
- Fixing the bugs: slow shadows, leaking UITableViewCells
- Wrap up

Project 31: Multibrowser	738
Setting up	
UIStackView by example	
Adding views to UIStackView with addArrangedSubview()	
Removing views from a UIStackView with removeArrangedSubview()	
iPad multitasking	
Wrap up	
Project 32: SwiftSearcher	764
Setting up	
Automatically resizing UITableViewCells with Dynamic Type and NSAttributedString	
How to use SFSafariViewController to browse a web page	
How to add Core Spotlight to index your app content	
Wrap up	
Project 33: What's that Whistle?	787
Setting up	
Recording from the microphone with AVAudioRecorder	
Animating UIStackView subview layout	
Writing to iCloud with CloudKit: CKRecord and CKAsset	
A hands-on guide to the CloudKit dashboard	
Reading from iCloud with CloudKit: CKQueryOperation and NSPredicate	
Working with CloudKit records: CKRecord.Reference, fetch(withRecordID:), and save()	
Delivering notifications with CloudKit push messages: CKQuerySubscription	
Wrap up	
Project 34: Four in a Row	857
Setting up	
Creating the interface with UIStackView	
Preparing for basic play	

Adding in players: GKGameModelPlayer
Detecting wins and draws in Four in a Row
How GameplayKit AI works: GKGameModel, GKGameModelPlayer
and GKGameModelUpdate
Implementing GKGameModel: gameModelUpdates(for:) and apply()
Creating a GameplayKit AI using GKMinmaxStrategist
Wrap up

Project 35: Random Numbers **901**

Setting up
Generating random numbers without GameplayKit
Generating random numbers with GameplayKit: GKRandomSource
Choosing a random number source: GKARC4RandomSource and
other GameplayKit options
Shaping GameplayKit random numbers: GKRandomDistribution,
GKShuffledDistribution and GKGaussianDistribution
Shuffling an array with GameplayKit: arrayByShufflingObjects(in:)
Wrap up

Project 36: Crashy Plane **919**

Setting up
Creating a player: resizeModeFill vs aspectFill
Sky, background and ground: parallax scrolling with SpriteKit
Creating collisions
Pixel-perfect physics in SpriteKit, plus explosions and more
Background music with SKAudioNode, an intro, plus game over
Wrap up

Project 37: Psychic Tester **955**

Setting up
Laying out the cards: addChildViewController()
Animating a 3D flip effect using transition(with:)
Adding a CAGradientLayer with IBDesignable and IBInspectable
Creating a particle system using CAEmitterLayer

Wiggling cards and background music with AVAudioPlayer
How to measure touch strength using 3D Touch
Communicating between iOS and watchOS: WCSSession
Designing a simple watchOS app to receive data
Wrap up

Project 38: GitHub Commits **998**

Setting up
Designing a Core Data model
Adding Core Data to our project: NSPersistentContainer
Creating an NSObject subclass with Xcode
Loading Core Data objects using NSFetchRequest and NSSortDescriptor
How to make a Core Data attribute unique using constraints
Examples of using NSPredicate to filter NSFetchRequest
Adding Core Data entity relationships: lightweight vs heavyweight migration
How to delete a Core Data object
Optimizing Core Data Performance using NSFetchedResultsController
Wrap up

Project 39: Unit testing with XCTest **1057**

Setting up
Creating our first unit test using XCTest
Loading our data and splitting up words: filter()
Counting unique strings in an array
measure(): How to optimize our slow code and adjust the baseline
Filtering using functions as parameters
Updating the user interface with filtering
User interface testing with XCTest
Wrap up

Appendix: The Swift Knowledge Base **1102**
