

# Contents

<b>Introduction</b>	<b>5</b>
Why Swift?	
About this course	
How to follow along	
<b>Simple data</b>	<b>9</b>
How to create variables and constants	
How to create strings	
How to store whole numbers	
How to store decimal numbers	
How to store truth with Booleans	
How to join strings together	
Summary: Simple data	
Checkpoint 1	
<b>Complex data</b>	<b>30</b>
How to store ordered data in arrays	
How to store and find data in dictionaries	
How to use sets for fast data lookup	
How to create and use enums	
How to use type annotations	
Summary: Complex data	
Checkpoint 2	
<b>Conditions and loops</b>	<b>54</b>
How to check a condition is true or false	
How to check multiple conditions	
How to use switch statements to check multiple conditions	

How to use the ternary conditional operator for quick tests  
How to use a for loop to repeat work  
How to use a while loop to repeat work  
How to skip loop items with break and continue  
Summary: Conditions and loops  
Checkpoint 3

## **Functions**

**87**

How to reuse code with functions  
How to return values from functions  
How to return multiple values from functions  
How to customize parameter labels  
How to provide default values for parameters  
How to handle errors in functions  
Summary: Functions  
Checkpoint 4

## **Closures**

**120**

How to create and use closures  
How to use trailing closures and shorthand syntax  
How to accept functions as parameters  
Summary: Closures  
Checkpoint 5

## **Structs**

**140**

How to create your own structs  
How to compute property values dynamically  
How to take action when a property changes  
How to create custom initializers  
How to limit access to internal data using access control  
Static properties and methods  
Summary: Structs  
Checkpoint 6

<b>Classes</b>	<b>163</b>
How to create your own classes	
How to make one class inherit from another	
How to add initializers for classes	
How to copy classes	
How to create a deinitializer for a class	
How to work with variables inside classes	
Summary: Classes	
Checkpoint 7	
<b>Protocols and extensions</b>	<b>183</b>
How to create and use protocols	
How to use opaque return types	
How to create and use extensions	
How to create and use protocol extensions	
How to get the most from protocol extensions	
Summary: Protocols and extensions	
Checkpoint 8	
<b>Optionals</b>	<b>213</b>
How to handle missing data with optionals	
How to unwrap optionals with guard	
How to unwrap optionals with nil coalescing	
How to handle multiple optionals using optional chaining	
How to handle function failure with optionals	
Summary: Optionals	
Checkpoint 9	
<b>Wrap up</b>	<b>231</b>
Where now?
