Contents

Preface 4
Welcome

The Basics of Testing 9
Why test?
Your first test
The anatomy of a test
The testing pyramid
So what’s the problem?

Unit Testing 35
Organizing unit tests
Custom setup and teardown
Control your inputs
Making assertions
Handling errors
Testing the tricky stuff
Advanced expectations
Performance testing
Monitoring tests
Random and parallel testing

Test Doubles 112
A little terminology
Dependency injection
Interfaces, not implementations
From protocols to injection
Where constructor injection fails… and succeeds
